## About APCO

Australian Packaging Covenant Organisation (APCO) is a co-regulatory not-for-profit organisation leading the development of a circular economy for packaging in Australia. APCO's vision is a packaging value chain that collaborates to keep packaging materials out of landfill and retains the maximum value of the materials, energy and labour within the local economy.

Each year, APCO Brand Owner Members are required to submit an APCO Annual Report and an APCO Action Plan. This document is the Annual Report and Action Plan output for the organisation listed above. This document provides the overall performance level of the organisation, as well as any commitments they have made to work towards on their packaging sustainability journey. This document may also include additional information provided by the Member in their report.

## APCO Action Plan Commitments

For each of the Packaging Sustainability Framework criteria listed below, a description is provided along with the commitments made by the organisation in their APCO Action Plan.

Criterion 1:

### Governance & Strategy:

This criteria considers actions to integrate packaging sustainability into business strategies.

- Develop a strategy that includes goals (objectives) and targets for packaging sustainability that addresses the Sustainable Packaging Guidelines (SPGs) or equivalent.
- Include a commitment to contribute to the achievement of the National Packaging Targets in our strategy.
- Have our executive or board of directors review our strategy and have the strategy integrated within our organisation processes.
- Regularly communicate and promote packaging sustainability objectives and targets within our organisation.

Criterion 2:

### Design & Procurement:

This criteria considers actions taken to ensure that sustainability principles are considered in the design or procurement of both new and existing packaging through use of the Sustainable Packaging Guidelines (SPGs).

- Consider the following Sustainable Packaging Principles in our packaging reviews:
  - Optimise material efficiency
  - Design to reduce product waste
  - Use of renewable materials
  - Use recycled materials
  - Design for transport efficiency
  - Design for accessibility
  - Provide consumer information on environmental sustainability

Criterion 3:

### Recycled Content:

This criteria considers actions taken to increase or optimise the amount of recycled material used by your organisation.

- Use recycled content in:
  - Other items which we purchase (e.g. office stationary and suppliers etc.)

Criterion 4:

**Recoverability:**

This criteria considers actions taken to improve the recovery of packaging at end-of-life and increase use of reusable packaging.

- 67% of our packaging to be designed to have all packaging components be recoverable at end-of-life.
- Use PREP to assess the recyclability of our packaging through kerbside collection in Australia and/or New Zealand.
- Investigate opportunities to use reusable packaging.
- 67% of our packaging to have all packaging components that are reusable.

## Criterion 5:

**Disposal Labelling:**

This criteria considers the extent to which packaging has been labelled to help consumers determine what to do with packaging at end-of-life.

- 25% of our packaging to have on-pack labelling to inform correct disposal.

## Criterion 6:

**On-site Waste:**

This criteria considers progress in increasing the amount of on-site solid waste being diverted from landfill.

- Have recycling programs for the following materials:
  - Paper/cardboard
  - Glass
- Aim for 75% of our on-site waste to be diverted from landfill.

## Criterion 7:

**Problematic Materials:**

This criteria considers the extent to which organisations are actively phasing out problematic and unnecessary single-use plastic packaging and preventing/reducing litter.

- Help reduce litter by:
  - Conducting regular clean ups on-site
