About APCO

Australian Packaging Covenant Organisation (APCO) is a co-regulatory not-for-profit organisation leading the development of a circular economy for packaging in Australia. APCO's vision is a packaging value chain that collaborates to keep packaging materials out of landfill and retains the maximum value of the materials, energy and labour within the local economy.

Each year, APCO Brand Owner Members are required to submit an APCO Annual Report and an APCO Action Plan. This document is the Annual Report and Action Plan output for the organisation listed above. This document provides the overall performance level of the organisation, as well as any commitments they have made to work towards on their packaging sustainability journey. This document may also include additional information provided by the Member in their report.

Overall Performance **Beyond Best Practice**

Additional Information

The information below indicates additional information that the organisation included in their APCO Annual Report.

Please tell us about any innovative packaging sustainability initiatives you have implemented during your chosen 12 month reporting period.

Last year, RPAC has moved to Signet FillPak to replace bubble wrap.

As per Nov. 2023, one of the supplier started its project to reduce the environmental impact of shipping packing materials.

Another supplier has used lighter and with homogenous material for its cuvettes.

Another supplier also has merged its two packages to one.

Please tell us of any constraints you may have had during your chosen 12 month reporting period that has impacted on your packaging sustainability initiatives and Covenant obligations.

All countries have different requirements on sustainability focus for the global suppliers to consider. RPAC has only limited control over the packaging used by global suppliers as we only import them in Australia.

However, we are currently working with our major supplier to work towards compliance with the requirements of APCO.

APCO Action Plan Commitments

For each of the Packaging Sustainability Framework criteria listed below, a description is provided along with the commitments made by the organisation in their APCO Action Plan.

Criteria 1:

Governance & Strategy:

This criteria considers actions to integrate packaging sustainability into business strategies.

- Develop a strategy that includes goals for packaging sustainability that addresses the Sustainable Packaging Guidelines (SPGs) or equivalent.

Criteria 2:

Design & Procurement:

This criteria considers actions taken to ensure that sustainability principles are considered in the design or procurement of both new and existing packaging through use of the Sustainable Packaging Guidelines (SPGs).

- Use the Sustainable Packaging Guidelines to review our packaging to identify opportunities for improvement.
- Record the outcomes of reviews or packaging using the Sustainable Packaging Guidelines so that any

team member can refer back to them in future and for auditing purposes.

Criteria 3:

Recycled Content:

This criteria considers actions taken to increase or optimise the amount of recycled material used by your organisation.

- Develop a policy or procedure to buy products and/or packaging made from recycled materials.
- Aim to use recycled materials in any packaging where this is feasible, including:
 - Primary packaging
 - Secondary packaging
 - Tertiary packaging

Criteria 4:

Recoverability:

This criteria considers actions taken to improve the recovery of packaging at end-of-life and increase use of reusable packaging.

- Investigate whether all of our packaging is recyclable at end-of-life and identify any gaps and opportunities for greater reuse or recycling.

Criteria 5:

Disposal Labelling:

This criteria considers the extent to which packaging has been labelled to help consumers determine what to do with packaging at end-of-life.

No commitments have been made for this criteria this year.

Criteria 6:

On-site Waste:

This criteria considers progress in increasing the amount of on-site solid waste being diverted from landfill.

- Develop a system to collect and recycle used packaging generated at our facilities.

Criteria 7:

Problematic Materials:

This criteria considers the extent to which organisations are actively phasing out problematic and unnecessary

single-use plastic packaging and preventing/reducing litter.

- Undertake the following to help reduce the impact of litter:
 - Conduct regular clean-ups on-site
 - Plan to participate in Business Clean-Up Day
 - Look for opportunities to redesign packaging to eliminate components that may have the propensity to become litter
 - RPAC performs site clean ups, business clean up days, constantly looking for and testing alternatives, packing changes to reduce non-recyclables.
- We will continue to perform the below activities:
- a) regular clean-ups on-site,
 - b) redesign packaging to eliminate components that may have the propensity to become litter.
 - c) conduct regular janitorial duties and recycle cardboards which is used in their packaging.

Further commitments:

These commitments look at additional actions the organisation may take to improve reporting.

No commitments have been made for this criteria this year.
