

# Annual Report and Action Plan

Company Name: **Abbe NSW Pty Ltd TA Abbe Group**

Trading As: **Abbe Group**

ABN: **93125187724**

## About APCO

Australian Packaging Covenant Organisation (APCO) is a co-regulatory not-for-profit organisation leading the development of a circular economy for packaging in Australia. APCO's vision is a packaging value chain that collaborates to keep packaging materials out of landfill and retains the maximum value of the materials, energy and labour within the local economy.

Each year, APCO Brand Owner Members are required to submit an APCO Annual Report and an APCO Action Plan. This document is the Annual Report and Action Plan output for the organisation listed above. This document provides the overall performance level of the organisation, as well as any commitments they have made to work towards on their packaging sustainability journey. This document may also include additional information provided by the Member in their report.

## Overall Performance **Beyond Best Practice**

The chart below indicates the overall performance level of this organisation listed above in the 2026 APCO Annual Report. The organisation's reporting period was **January, 2025 - December, 2025**.

### Understanding APCO Annual Reporting performance levels:

- 1 Getting Started:** You are at the start of your packaging sustainability journey.
- 2 Good Progress:** You have made some first steps on your packaging sustainability journey.
- 3 Advanced:** You have taken tangible action on your packaging sustainability journey.
- 4 Leading:** You have made significant progress on your packaging sustainability journey.
- 5 Beyond Best Practice:** You have received the highest performance level and have made significant progress on your packaging sustainability journey.

## Additional Information

The information below indicates additional information that the organisation included in their APCO Annual Report.

**Describe initiatives, processes or practices that you have implemented during your 12-month reporting period that have improved packaging sustainability**

While cardboard boxes are 100% recyclable, in the interests of improving our sustainability footprint, we continue to increase the recycled content of our product wherever feasible, ensuring that our product remain fit for purpose within our customers' supply chains. This often involves redesigning packaging to maintain strength and performance while using higher levels of recycled material. In parallel, we actively work to reduce and eliminate problematic single-use plastics from our packaging solutions. Until suitable reusable alternatives become available we have had a number of successes working collaboratively with customers to eliminate the use of stretch wrapping. Where this is feasible, in addition to environmental impact considerations, it also delivers cost efficiencies for customers.

## APCO Action Plan Commitments

For each of the Packaging Sustainability Framework criteria listed below, a description is provided along with the commitments made by the organisation in their APCO Action Plan.

Criterion 1:

### **Governance & Strategy:**

This criteria considers actions to integrate packaging sustainability into business strategies.

- Develop a strategy that includes goals (objectives) and targets for packaging sustainability that addresses the Sustainable Packaging Guidelines (SPGs) or equivalent.
- Include a commitment to contribute to the achievement of the National Packaging Targets in our strategy.
- Have our executive or board of directors review our strategy and have the strategy integrated within our organisation processes.
- Regularly communicate and promote packaging sustainability objectives and targets within our organisation.
- Regularly engage or communicate with our external stakeholders about the environmental impacts of our packaging.
- Actively participate in initiatives to promote packaging sustainability outside of our organisation.

Criterion 2:

### **Design & Procurement:**

This criteria considers actions taken to ensure that sustainability principles are considered in the design or procurement of both new and existing packaging through use of the Sustainable Packaging Guidelines (SPGs).

- Review **100%** of our packaging against the Sustainable Packaging Guidelines (SPGs) (or equivalent).

- Improve the accuracy of our data regarding reviews of packaging using the Sustainable Packaging Guidelines (or equivalent).
- Consider the following Sustainable Packaging Principles in our packaging reviews:
  - Design for recovery
  - Optimise material efficiency
  - Design to reduce product waste
  - Eliminate hazardous materials
  - Use recycled materials
  - Use of renewable materials
  - Design to minimise litter
  - Design for transport efficiency
  - Design for accessibility
  - Provide consumer information on environmental sustainability
- 100% of our packaging to be optimised for material efficiency.
- Improve the accuracy of our data regarding packaging material efficiency.

## Criterion 3:

**Recycled Content:**

This criteria considers actions taken to increase or optimise the amount of recycled material used by your organisation.

- Develop a policy or procedure to buy products and/or packaging made from recycled content.
- Use recycled content in:
  - Our products
  - Other items which we purchase (e.g. office stationary and suppliers etc.)
- 100% of our packaging to be made using some level of recycled content.
- Improve the accuracy of our data regarding use of recycled content.
- Provide customers with the option to purchase packaging with the highest level of recycled content technically feasible.

## Criterion 4:

**Recoverability:**

This criteria considers actions taken to improve the recovery of packaging at end-of-life and increase use of reusable packaging.

- 100% of our packaging to be designed to have all packaging components be recoverable at end-of-life.
- Improve the accuracy of our data regarding recoverability.
- Improve the accuracy of our data regarding reuse.

## Criterion 5:

**Disposal Labelling:**

This criteria considers the extent to which packaging has been labelled to help consumers determine what to do with packaging at end-of-life.

- Provide customers with information on the recoverability of our packaging to inform correct disposal labelling on-pack.

Criterion 6:

#### On-site Waste:

This criteria considers progress in increasing the amount of on-site solid waste being diverted from landfill.

- Have recycling programs for the following materials:
  - Paper/cardboard
  - Soft plastics
  - Glass
  - Metals
- Aim for **100%** of our on-site waste to be diverted from landfill.
- Improve the accuracy of our data regarding on-site waste.

Criterion 7:

#### Problematic Materials:

This criteria considers the extent to which organisations are actively phasing out problematic and unnecessary single-use plastic packaging and preventing/reducing litter.

- Help reduce litter by:
  - Participating in a planned Business Clean Up Day
  - Abbe manufactures cardboard packaging that is fully recyclable and biodegradable. Single use plastics are used to strap product on pallets and in some cases stretch wrap product. We continuously explore ways to eliminating these single use plastics by transitioning to paper-based or reusable alternatives. We also work collaboratively with customers in exploring solutions that avoid the use of single use plastics.
